P. C. Spek

Our sole Agent for Canada

Mr. P. C. SPEK

will be in Canada during
April until July. Please address
during that time all correspondence to

P. C. SPEK

218, Bay Street

Toronto

Ontario

TERMS OF SALE

When ordering it is understood that the buyer agrees with these terms and remarks. **YOUR SPECIAL TERMS**, if agreed upon when ordering and written on a signed ordersheet will always be wellcome.

1. All former catalogues are herewith void.
2. Prices are quoted net and subject to market fluctuations, 50 at 100 rate, 500 at 1000 rate.
3. All goods travel at purchaser's risk and expense from seller's nurseries and are sold, taken and accepted at his nurseries.
4. Unless contrary orders are given, insurance will be provided for at purchaser's cost.
5. Packing and cases will be charged at cost price and are not returnable.
6. All fall accounts are due January 1st; all spring accounts May 1st. All fall shipments, paid within one month from date of invoice, are entitled to two percent discount. No discount will be allowed on accounts of spring shipments.
7. Claims as to the quality of the goods cannot be entertained, unless made immediately on receipt of same.
8. The seller gives no warranty, express or implied and is not responsible for damage by heating or frost during the voyage nor for any delay in forwarding the goods, all complaints referring thereto should be made directly to the Railway Company or Shipping Company delivering the goods.
9. The seller is not responsible for the results of planting or forcing of any goods sent out, **he guarantees only all varieties to be true to name and description but he does not give any warranty of any article that is wrongly labelled.**
10. Frost in accepted by the buyer as force majeure, if any time of shipment has been contracted.
11. Freight and duty are for buyer's account, unless otherwise contracted.
12. Everything is offered subject to being unsold and subject to shortage or failure of crop or other causes beyond control.
13. If the currency in which the goods are sold devaluates or deflates before such goods are shipped, the seller can raise the price to their previous gold value, or cancel the orders.
14. If at the time of shipment the buyer has not yet settled his last years account or the reports, in seller's opinion, are unsatisfactory, the seller reserves to himself the right to withdraw, without any indemnification, all arrangements.
15. Cancellations will not be accepted.

RAIM. MOERMAN.

The Tuberous Rooted Begonia

For many years the begonia has become a very popular plant. With its bright colours of flowers, richness of foliage and easy culture it has become a favorite with the public in gardens and homes.

In the smallest dwelling, in the flowerbeds or greenhouses, they are admired for their rapid growth and abundance of flowers.

On exhibitions they are admired by the crowd on account of their bright coloured flowers on a sheet of velvet green foliage.

EMPLACEMENT. — The begonia prefers partial shadow and not to warm place where they will give best result specially in wet summers. For the cultivation in greenhouses, shadow is necessary.

CULTIVATION. — Forcing can be started in February March or April depending on the time they should be in flower. The bulbs are placed in boxes, on light porous soil close together, and then covered with earth to a depth of one inch above the bulb. The earth should be kept just moist, too much water will rot the bulbs.

When the plants begin to develop they are placed in pots.

PLANTING OUTSIDE. — In May they can be planted outside, preferable in loose soil, and shaded for some days after planting. The distance between the plants should be about 8 inches. A little fertilizer added in July will stimulate growth and flowers.

STORAGE. — The begonia and gloxinia bulbs should be kept in a semi moist place in a temperature not below 38 degrees Fahrenheit. Steam or warm water heat is not very good for keeping these bulbs as it dries them out too much.

RAIM. MOERMAN, Begonia-specialist, LA PINTE (Belgium)

Tuberous Rooted Begonia

Ready for shipment from November until March

Large Flowering Single Begonia

dark red
 scarlet red
 pink
 orange
 white
 yellow

Gloxinia Hybrids & Crassifolia

CULTIVATION : Gloxinia's can be started in the greenhouse during the month of Januari. They are best put in boxes in a light porous soil, after they have made a growth of 4-6 inches they can be placed in pots. Gloxinia suffer very easy from excess of moisture, aircurrents, or to cold temperatures. With high temperatures it is preferable to shade them. They can be shipped from oktober till February. In their dormant state the temperature should never be below 7 degrees Farenheit.

ETOILE DE FEU, brilliant red

EMPEROR WILLIAM,

diam. : 3-4 cm.

3-6 cm.

4-7 cm.

EMPEROR FREDERIC

ROI DES ROUGES, dark red
